

GAUGE SIPHONS GSV

DESCRIPTION

The GSV series pressure gauge siphons have been designed to protect pressure gauges from the effect of rapid pressure surges and hot pressure fluids. Specifically designed to replace the traditional "pigtail" and other coil design siphons where it is necessary to eliminate gauge whip and vibration. They operate as cooling elements for liquids and gases in pressure measuring devices. An isolation pressure gauge cock is recommended to be installed in combination with gauge siphons.

MAIN FEATURES

Complete stainless steel construction
Compact sturdy design, requires minimum space for installation.

OPTIONS: Different kind of connections.
USE: Pressure gauge protection on steam, water, compressed air and other fluids systems compatible with the construction.

AVAILABLE MODELS: GSV
SIZES : G 1/2" (male x female)
CONNECTIONS: ISO 228-1
INSTALLATION: Vertical
LIMITINNG
CONDITIONS: 63 bar at 400 °C; 100 bar at 120 °C
WEIGHT: 0,42 Kg
MATERIALS: AISI 316L / 1.4404

Typical Installation

Horizontal pipe

Top of vessel
